OneCloud Access

1. Connect to Deloitte VPN and login to MAC portal(https://mac.us.deloitte.com/) to request access to all the cloud providers.

   Follow the Steps given in the **AzureAD_Access_Model_Final_Version1.3 (2).pdf** document.

 | Cloud Provider | Access Code |
   |---|---|
   | AWS | SG-US-035825521573-Admin |
   | Azure | SG-US AZU AME CON HashedinAzureInternalPOC NPD 001 DevOps |
   | GCP | SG-US GCP ame CON 116 NPD 1 DevOps |

   Vijay will approve this and After 24 hours you will be able to access cloud.

2. Generating elevated password from secret server
   Refer the **AzureAD_Access_Model_Final_Version1.3 (2).pdf** document

3. To access AWS
   Login to https://myapps.microsoft.com/ and Choose AWS app name - "US AWS CON NPD 1247 - HashedIn Learn NONPROD"

4. To access azure, Login to azure portal and access
   Resource group: azrg-use2-con-npdhashedinazureinternalpoc-npd-001
   Subscription name: US-AZSUB-AME-CON-HASHEDIN-AZURE-INTERNAL-POC-NPD

5. To access GCP
   Login to
   https://console.cloud.google.com/compute/instances?referrer=search&project=us-gcp-ame-con-116-npd-1

choose organization as deloitte.com and project id : "us-gcp-ame-con-116-npd-1"

Brief Screenshots

- Here is the view of the MAC Portal > Manage My Access.
- In the given search bar directly paste the Access Code specified in the table.

- Select the checkbox > Next > Submit

Thycotic Secret Server

- Use your Deloitte Credentials to login to generate the Secrets for One Cloud.
